

DEFEND YOUR DIGITAL LIFE

DON'T CLICK THAT LINK!

Don't click links in emails. Instead, type the URL you want to access directly in the browser. That avoid to be hacked by phishing

USE TWO-FACTOR AUTHENTICATION

Use a robust second factor for logging into accounts, you being much less likely to lose personal data due to phishing

ENCRYPT STORE DATA

Encrypt any data you store/share
Encryption is a layer of protection that can prevent lost or stolen data from being exposed
